

Know the Facts!

Don't Sign Gov.'s Initiative Petitions!

They're back!

With an April 19 deadline, signature gatherers are once again spreading out across the Los Angeles area in an effort to put Gov. Schwarzenegger's anti-worker initiatives on a November special election ballot. The corporate powers behind the initiatives are so desperate, they're paying \$10 per signature!

Know the facts.

Schwarzenegger's agenda is bad news for public employees and all Californians. He is proposing to dismantle the state's public pension system – including death and disability benefits for firefighters and police and their survivors! Not only would that make it much harder to attract and retain qualified personnel, it will cost California taxpayers more than \$7 billion dollars in the first ten years alone.

To add insult to injury, the governor's special election will cost us a fortune. His campaign committees are brazenly outsourcing the verification to India!

The bottom line?

The special election in November will cost California taxpayers an estimated \$70 million, harm public employees, undercut our unions and do nothing to solve the state's budget problems!

HOW YOU CAN HELP:

- Make sure the signature gatherers stay in the free speech area when on campus; complain to the store manager whenever you see the gatherers in your community
- Talk to all your friends and family members about the facts of these initiatives
- **Don't sign**
